

"I love the WHY TYPE®... it's simple, it's efficient, and it decreases costs to my practice."

Steven Shama, MD
Dermatology

"Generally I do 15-25 charts per afternoon, and it takes 1 1/2 minutes to do each chart... I had excellent training."

William Mason, MD
Otolaryngology

"The accuracy of this system with my training has been 98%, and overall I'm extremely pleased."

Walter Lee, MD
Internal Medicine

"I have been using the WHY TYPE® Medical... in my urological practice for the past 4 years... it also allows me to eliminate a secretarial transcription service"

Joseph Adolph, MD
Urology

WHY TYPE® MEDICAL SOLUTION

WHY TYPE®?...

... when you can talk **NATURALLY!** Medical professionals can use a dictation system specifically developed for their unique needs. The WHY TYPE® Medical Solution (WTMS) is an add-on to existing speech recognition software such as Dragon® NaturallySpeaking®. The WTMS can include on-site one-on-one training, medical forms and text macros. In addition, it contains voice commands for word processors, electronic medical record software and additional applications. The WTMS incorporates user-specific customization, configuration, support, etc.

With the WTMS enhancing your speech recognition system, you can instantly produce entire letters and client records by voice **without pausing**. Medical text is immediately and legibly transcribed with no topographic or spelling mistakes. Transcription delays, errors and costs are eliminated. Doctors can create correspondence themselves, without having to rely on others.

Using our specialized medical phrases and forms, text is transcribed with the speed and accuracy your profession requires. You can even verify accuracy as you dictate. There is no delay as medical notes get generated, reviewed, printed and filed. The WTMS improves your speech recognition software to make it the **fastest and most accurate speech recognition product** on the market.

The WHY TYPE® Medical Solution is available 24 hours a day, seven days a week. Using a laptop computer, you can take the WTMS with you. Medical notes can be created both at home and in the office. With our easy-to-use speech commands, referral letters and patient notes are quickly sent to the referring doctor or correspondent.

As astonishing as it sounds, talking to your computer really does work! As the need for instant and legible documentation of medical notes increases, we are certain that many doctors will soon be asking themselves the following question - "WHY TYPE®?"

FEATURES

WHY TYPE® Medical Macros. The WHY TYPE® Medical Solution includes extensive "field tested" macros for the medical professional. We created macros and scripts that allow you to bring up forms and records with simple voice commands. File management and faxing features are also included in your WTMS.

WHY TYPE® Medical Forms. What makes the WHY TYPE® Medical Solution really productive is the unique way we have combined medical forms with voice macros. By "filling in the blanks" you can significantly decrease the time you spend dictating standard medical text. Using our simple voice

commands to move between fields, you can quickly complete patient notes, referral letters, insurance reports, discharge summaries, physicals, and general correspondence.

WHY TYPE® Training and Support. One of the key features of our WHY TYPE® Medical Solution is a training program that has been developed specifically for doctors and medical professionals. Our "quick start" program and "cheat sheets" help first-time computer users and busy professionals get up and running immediately.
